Conceptual progression maps: I mapped threads of disciplinary knowledge and tier-specific vocabulary to add a knowledge-rich layer to the Expressive Arts AoLE of the Curriculum for Wales, as part of a cross-county project led by education consultant Lucy Crehan. For some of the five arts disciplines, this involved synthesising contributions from focus groups. This excerpt is from the Film and Digital Media domain, which I authored independently based on my own expertise, and later adapted for the specific needs of the school in which I work.

Discipline: Film and Digital Media		Progression Step 3 (Years 4-6)	
Elements	Knowledge and Skills	Vocabulary	Suggested Learning Experiences
	Narrative - Create storyboards (labelled with speech, sound and shot types) when planning filmmaking projects. Describe characters (including motivations, problems, solutions.) Understand and use flashbacks (and forwards) and foreshadowing. Identify the inciting incidents in stories. Watch and create non-linear films - "moving art" - that do not tell stories but explore interesting visual and audio combinations. Begin to think about meanings that can be created by juxtaposing contrasting visual or audio elements. Identify genres (comedy, horror, sci-fi) and understand that many media texts do not belong in just one of these categories (e.g. a film might be a comedy sci-fi). Institutions - Consolidate skills from P.S.2. Begin to appreciate the costs involved in media production and the ways in which these may be covered, e.g. TV licensing, advertising revenue, cinema ticket sales, merchandise, grants. Begin to appreciate that digital media texts are created by large teams and are often paid for by large institutions, so there will be many voices influencing the final output. Consider what has motivated the creation of media texts they use e.g. a computer game, an educational website, a radio advert. Audiences - Decide on target audiences before creating digital media; survey what their audiences want and need before creating content, and get feedback from focus groups. Appreciate that different audience groups (e.g. teachers, parents, pupils) will favour different things and consider how to appeal to wider audiences. Create digital content to share on school social media or the class page of the school website. Representation - Consolidate skills from P.S.2. Discuss the ways in which their own expressed preferences 'represent' their identities (e.g. what does it tell others about you when you say your favourite celebrity is X?) Begin to understand media re-presentation as repackaging the world rather than simply reflecting it: the same subject matter can be represented very differently by two media texts. Production - Know the possible meanings or moods that a director is intending when using different shot types and camera angles. Know the difference between diegetic and non-diegetic sound and the ways these contribute to the overall meaning of a media text. Begin to understand the symbolic meanings of objects in the mise en scene.	setting inciting incident protagonist antagonist diegetic non-diegetic focus group licensing revenue profit zoom pan gaze mise en scene foreshadowing flashback contrast juxtaposition documentary digital footprint	Watch a variety of short films or clips from a range of times and places. Focusing on the audio elements, identify which sounds are diegetic and which are non-diegetic, and discuss the effects of each on the overall meaning that is being created by the audience. Describe everything that can be seen on the screen, encouraging the children to think about why it was purposefully placed there, and what certain objects might symbolise. Look at the same moving image (e.g. scene from silent film) while listening to different genres of music or sound effects; discuss how the meaning changes for audiences. When learning about current events or humanities topics, compare the ways they have been repackaged and presented by various news programmes (across media) or types of documentaries, noticing the narrative structure that is applied (setting/exposition, inciting incident, problem, potential solutions, (whole or partial) resolution) even though these are 'non-fiction' texts. Provide opportunities for children to refine roles/develop an area of expertise when creating film and digital media output in teams; create films, podcasts and other digital media for specific purposes e.g. class assemblies, promoting charities, spreading awareness, celebrating successes, entertainment. Task the children with creating content for the school's digital media. Review film, TV, radio, games or websites in detail. As part of the creative process: Learners should be made aware that they are exploring an element because they are going to have an opportunity to use and apply it in their own creative pieces. They will ask and answer questions about the ways in which film directors/ film production companies and media creators have applied these elements, and talk about the moods or feelings expressed in the films and media they watch/use.

Discipline: Film and Digital Media		Progression Step 3 (Years 4-6)	
Technique	Knowledge and Skills	Vocabulary	Suggested Learning Experiences
	Use a digital device independently, and follow a storyboard/shot list, to shoot footage for a planned film project (knowing that successful takes, each from prechosen angles and distances, can be edited together later). Decide in advance of filming how lighting, costume, props, sound effects, music, use of green screen and applicable elements from 'Art' and 'Music' disciplines could elicit a desired response from an audience (conveying a message, feeling or mood successfully.) With growing independence, crop and order clips in editing software/app (e.g. Adobe Express), adding well-chosen transitions (considering the impact on overall meaning from cross-fades and jump cuts) and non-diegetic sound. Use a digital device to record audio, such as an interview for a radio programme or podcast, and begin to crop and order sound clips in an editing software/app. Start to develop expertise in a specific role when working in a group: a camera operator filming, a director giving instructions, an actor or presenter being filmed, an editor choosing what to keep and what to cut. Demonstrate an awareness of the views of their audiences when planning, making and evaluating. Edit digital photographs by cropping, rotating, applying a premade filter, or begin to use manual functions to adjust brightness, contrast and saturation. Use an app to create images, collages and infographics to create an informative post or persuasive advert for publication on social media.	shot list interior (int.) exterior (ext.) fade in fade out zoom pan mid-shot high angle low angle wipe morph jump dissolve contrast brightness saturation voiceover infographic	Support children to cooperate in teams, fulfilling their roles and evaluating their own performances. Teach children the ICT skills necessary to bring their ideas to fruition. As part of the creative process: Learners will show resilience when developing technical skills and refining their own pieces in response to constructive feedback, and will support others to do the same. Learners should have the opportunity to plan creative outcomes (for a range of audiences and purposes) that enable them to apply the elements studied and technical skills developed. Learner's outcomes at the end of a creative process should represent, document or celebrate ideas, feelings, moods and identities. Learners should have an opportunity to share and celebrate their outcomes, and compare their work with the work of peers, media creatives, and people from different times and places. They should learn to give and receive feedback on finished pieces. The whole process should be valued as much as the outcome.

Sample of planning support for teachers: I distilled the requirements of the three 'Statements of What Matters' from the Expressive Arts AoLE to create a 'formula' for each arts discipline that teacher colleagues could use to design meaningful and progressive units of work that embody the creative process. This example is for the discipline of Art.

Ideas for a unit of ART – Topic:

A lesson about an artist, craftsperson or art movement. How is meaning made?	A lesson to explore an element (e.g. line, tone, form) through a range of media. Technical vocabulary:	A lesson to develop ideas in sketchbooks, select a medium and plan an artwork.	A lesson to create.
An opportunity to exhibit, evaluate and be appraised.		An opportunity to make links between learning in this unit with learning in another artform.	

Excerpt from unit of work: After supporting colleagues to draft unit overviews, I created lesson outlines for each discipline in each year group, ensuring coverage of the key knowledge, vocabulary and experiences from my conceptual planning maps in each progression step.

YEAR 5 DRAMA

1. Understand how myth inspired theatre.

Curriculum for Wales 'Descriptions of Learning':

- I can apply knowledge and understanding of context and make connections between my own creative work and creative work by other people and from other places and times.

Greek theatre is still one of the most important and long-lasting theatrical influences in the world, dating from around 700 BC and with some Greek plays still being performed to this day. The Greek empire was far-reaching, and as a result, theatre was spread throughout much of the world, along with the mythological tales that many plays were based upon. The two genres of Greek theatre that still exist are **tragedy** and **comedy**. Look at some examples of myths that inspired Greek theatre, such as *Perseus and Medusa*, or *Persephone and the pomegranate seeds*. There are KS2 scripts for these plays available online.

Tell the children that they are going to dramatise one of the myths that they have been studying in class. Ask them to sort the myths they know according to genre: are they comedy or tragedy? Would they fit into any other modern genres that we know and love? Would it be effective to perform these plays in the style of Greek theatre (outdoors, wearing masks) or in the style of traditional British theatre (indoors on a stage)? Which of the myths they have studied would make a great play and why?

2. Explore archetypes in myth and theatre.

Curriculum for Wales 'Descriptions of Learning':

- I can explore how creative work can represent, document, share and celebrate personal, social and cultural identities.
- I can reflect upon how artists have achieved effects or communicated moods, emotions and ideas in their work.

If we think of myths as ancient explanations for the mysteries of life, patterns become clear. Characters in myths often represent much more than a single person. They are not just types, but archetypes. **Archetype** is a term from Ancient Greece, meaning a model on which other things are based. The use of the term archetype for myth and drama was made popular by the psychoanalyst C. G. Jung, who found patterns in folklore, myth, and art. Some of the archetypes he identified were: the king, the mother, the sage, the hero, the villain.

Present the children with printed photos of characters from films, comics, TV shows and computer games that they will recognise. Ask them to sort these into hero/villain/other. Look through the 'other' pile - do these fit any of Jung's archetypes, or can we think of more categories for modern text types?

Look at the characters in the myths being studied in class - are there any archetypes? How would each character's lines be performed? Is there a particular **body language** or **tone of voice** that suits an archetype?

3. Perform archetypal characters and use proxemics.

Curriculum for Wales 'Descriptions of Learning':

- I can perform, produce, design, exhibit and share my creative work in formal and non-formal contexts, considering the impact of my creative work on the audience.
- I can identify and respond creatively to challenges with resilience and flexibility.

Display the term proxemics, and archetypes such as hero, villain, sage, king, mother.

In this lesson the children will work in small groups. Assign each group a film clip on an iPad or laptop featuring archetypal characters such as heroes, villains, sages and kings interacting. They must watch it as a group, then try to recreate it as accurately as possible. They must consider **body language**, **movement**, **voice**, **expression** and **proxemics**.

When they perform for other groups to watch, all feedback and discussion should focus on how body language, movement, voice, expression and proxemics helped to show the audience which archetype each character belonged to.

4. Plan a performance.

Curriculum for Wales 'Descriptions of Learning':

- I can combine my knowledge, experience and understanding to plan and communicate my creative work for a range of different audiences, purposes and outcomes.
- I can draw upon my familiarity with a range of discipline-specific techniques in my creative work.

Children will work together in groups to dramatise one of the myths they have studied in class.

The teacher will decide whether the children should write a formal script, a story board, or something less formal such as a story map that is then turned into physical tableaux that the children can photograph for future reference.

When the children get to the point that they are rehearsing the performance, ensure that they remember to apply their learning about body language, movement, voice, expression and proxemics to the archetypal characters in their myths.

Decide as a class whether the children want to perform these plays in front of a wider audience, or whether they would prefer to be filmed. Either way, they need to share their work with someone to receive **feedback** - could the audience identify the archetypes in their plays?

Excerpt from Expressive Arts policy: I use descriptors from the 'four core purposes' of the Curriculum for Wales alongside the key points of the school policy documents that I am responsible for writing. I have successfully embedded rich arts-based learning across the school by ensuring that colleagues appreciate the purposes of arts disciplines.

Purposes of Teaching Expressive Arts

The Expressive Arts at (*school name*) include **Dance, Drama, Music, Art, and Film and Digital Media**. These areas exemplify the creative process; they are rich in opportunities for children to think or behave imaginatively, to generate something original and reflect on the outcomes.

We recognise and support the intrinsic value of each art form in its own right; we want children to experience and enjoy imagining, creating, interpreting, composing, collaborating and performing, purely for the pleasure and joy that they bring. We also aim to apply the creative process developed in the five main disciplines when exploring other creative activities such as creative writing and debating.

We also believe that the Expressive Arts help children to access learning across the curriculum in new, different and exciting ways. Through the Expressive Arts, children's knowledge and understanding is enhanced in a more meaningful and immediate context. Expressive Arts lessons enable children to develop an understanding and appreciation of cultures within the school, the local community and across the World.

In fact, arts-based learning can develop the core values that we would wish for our children, such as independence, an appreciation of sustainability, and an understanding of the rights and responsibilities that all citizens possess.

As with all Areas of Learning and Experience, the Expressive Arts must develop the mandatory cross curricular skills detailed in LNF and DCF, and teachers at (*school name*) will capitalise on the wealth of opportunities presented by the five disciplines to do so.

Enterprising, creative contributors express ideas and emotions through different media; think creatively to reframe and solve problems; connect and apply their knowledge and skills to create ideas and products.

Ethical, informed citizens are knowledgeable about their culture, community, society and the world, now and in the past; respect the needs and rights of others, as a member of a diverse society.

Enterprising, creative contributors are ready to play a full part in life and work. **Healthy, confident individuals** have the skills and knowledge to manage everyday life as independently as they can; have secure values and are establishing their spiritual and ethical beliefs. **Ethical, informed citizens** show their commitment to the sustainability of the planet; engage with contemporary issues based upon their knowledge and values; understand and exercise their human and democratic responsibilities and rights.

Introduction to resource pack: I was selected to join a working party to develop resources for Swansea schools which promoted 'cynefin' and supported the teaching of Religions, Values and Ethics. My contribution centred on Swansea's historical copper industry and its links to slavery.

Swansea: The City Built From Copper

A journey past the defunct copper factories on the Copper Jack River Cruise, and a visit to the National Waterfront Museum, will inspire discussions about the positive and negative impacts of Swansea's industrial past.

Read on for a brief history of 'Copperopolis', followed by 'Big Questions' to stimulate learning across the six AoLEs in relation to Cynefin and RVE.

Background Information

The copper refining industry flourished in Swansea in the middle of the 19th Century. Swansea was close to the South Wales coal mines (coal was essential for the smelting techniques used at the time), and the ideal location to import copper ore by sea (the cheapest form of transport for heavy goods such as ore.)¹

Many people moved from rural areas to work in Swansea. Copper workers were paid higher wages, and more regularly, than farm labourers. Some owners of copper works built schools for the children of the copper workers, and some even built housing, such as the flats built by John Morris of Forest Copper Works in 'Morris Town'. Many people immigrated from Ireland to work in the copper industry, but racist Language against Irish immigrants became commonplace, and there were several serious anti-Irish riots in the area during the Nineteenth Century. Authorities tried to limit the number of passengers arriving from Ireland by ships, so captains began dropping off passengers on beaches and inlets, which was not safe.³

***"It came to pass in days of yore,
The devil chanced upon Landore.
Quoth he: by all this fume and stink
I can't be far from home I think."***²

The many copper works formed a chain along the River Tawe. The industry led to the development of Swansea as an important urban centre, but it also had negative effects on the local environment and the lives of the people of Swansea.

"In its industrial heyday, views of the Swansea town scape were dominated by scores of chimney stacks bellowing columns of black smoke. Fires erupting from furnaces were also visible, whilst toxic fumes of sulphur and arsenic choked the town."⁴

Subject knowledge support for teachers: the brief from the Local Authority Lead for RVE required significant academic research to ensure teachers were being provided with authenticated subject knowledge.

Timeline

Before	The main industries in the Swansea area were farming, fishing and trade. ⁹
C18th	The Trans-Atlantic slave trade began in the early Sixteenth Century.
C18th	Copper industry developed, using copper ore that had been mined in the British Isles, ¹⁰ much of which came from Devon and Cornwall. ⁷
	1717 – First copperworks in Swansea established by John Lane in Landore. ¹¹
	1788 - Thomas Williams, a copper master in Penclawdd, petitioned the House of Lords object to plans to regulate the Slave Trade. He and his partners had invested over £70,000 in machinery specifically to make goods for the 'African Trade'. ¹²
1800s	1807 – The British Parliament passed an Act to abolish the trade in enslaved people.
1820s	Copper industry in the Swansea district became the export market for most of the world's copper mining regions (ultimately leading to Britain becoming the world's largest producer of refined copper.) ¹³
	At this time, smelters in Wales used copper ore from mines in South America, Australia, Southern Africa, and North America. ¹⁴
	1822 – Joint anti-slavery society was established at Swansea and Neath. ¹⁵
1830s	7.4.1831 – The committee of the Anti-Slavery Society in Swansea declared continued support for the end of slavery and a hope that parliamentary members would support the wishes of people expressed in 5000 petitions on the matter. ¹⁶
	1834 – enslaved people living in British colonies were freed.
1840s	It was common for children to work in copper works or coal mines at this time. In 1842, The Mines Act banned children under ten from working in mines. ¹⁷
	Approximately one million people left Ireland in search of work due to the 1846 potato famine. ¹⁸
1850s	North Dock completed in Swansea in 1852. South Dock completed in Swansea in 1859.
1860s	Countries that had previously exported copper ore to Wales increasingly smelted and refined it themselves, starting to outcompete the Swansea producers. ¹⁹
	By this time, tinsplate, nickel, cobalt and alkali Industries had also established in Swansea. ²⁰
1880s	United States overtook Britain as the world's largest producer of refined copper. ²¹ Prince of Wales Dock completed in 1881.
1900s	1901 – 'Shed 23' – the red brick warehouse that now forms part of the Waterfront Museum, was built on the South Dock (now known as Swansea Marina).
1910s	1911 - Glynn Vivian Art Gallery in Swansea city centre was founded by the son of copper magnate John Henry Vivian.
1920s	1924 – Smelting of copper ended in Swansea. ²²
1970s	Brownies in Swansea planted pine trees on Kilvey Hill as these types of trees could grow in the area polluted by the copper industry.

Excerpt from curriculum map: I demonstrated the application of the resources to a wide range of schools and abilities with a star-rating system for suggested enquiry stimuli.

Suggested Tasks and Big Questions

Expressive Arts	★ Can you use copper wire to make a sculpture inspired by Swansea's history of copper production. How could you represent the shapes of copper works in the landscape, or the River Tawe, with wire? ★ How could you represent the River Tawe through music and/or movement? ★★ The Glynn Vivian Art Gallery was funded by the Vivian Family whose fortune came from the copper industry. How has Swansea benefitted from this donation? What type of art can you see there? ★★ How could you depict the impact of the copper industry on Swansea through music and/or movement? ★★★ Can we separate art from its creators, patrons or owners? Does it matter where the money that pays for art and cultural events comes from? Can objects such as manillas and neptunes be valued aesthetically even though they have been used in unethical trade? Should they be displayed in museums?
Health and Wellbeing	★ How can we make sure that our lives and work do not damage the environment? What would a 'healthy' city look like? ★ What makes a kind 'boss'? If you were leading a group, how would you treat the other group members? You could try working in a group, where one person is in charge, to build a model – how does everyone feel afterwards? ★★ An attempt was made by residents of Kilvey Hill to sue the Vivian family over the air pollution caused by the copper industry. How can we find a balance between building a strong economy and looking after the environment? ★★★ How has the identity of the people of Swansea been shaped by its industrial past? How do we find the balance between being proud of where we come from with also acknowledging some of the negative things that are inherently linked to the growth of our hometown?
Humanities	★ Look at maps of Swansea from before, during and after the industrial revolution. How did the city grow and change? Are there any place names that have come from the copper works or their owners? ★★ Record yourself as a tour guide aboard the Copper Jack. How would you explain the history of the places that you travel past to tourists who have not been to the city before? How do you feel after having talked about your hometown? ★★ Survey the people in your school community to find out how many of them know about Jessie Donaldson (a teacher from Swansea who campaigned for the abolition of slavery). Is she well-known? What can you find out about Jessie? Can you educate others about her? ★★★ Write a letter to the council to make a case for or against a statue to commemorate the copper industry in Swansea. Is this something that should be remembered, talked about, or celebrated? Are there any parallels between issues from the peak of the copper industry in Swansea with issues in the news today, and if so, what could we learn from the events of the past?

Sample of differentiated language resources: I created several resource packs when studying for a Graduate Certificate in Welsh for Education Practitioners in the English Medium Sector, for which I received a Distinction grade. This sample uses my own illustrations (drawn with Procreate) and uses the hook of the history of the grounds of my current school to teach the use of passive voice.

The examples illustrate differentiation through the complexity of the sentences in the comprehension text, and the movement from closed to open questions.

Y Dyniaethau

Tasg Ddarllen: lefel gyffredinol

Hanes Cae'r Ysgoll

Cafodd y cae ei aredig gan geffylau. Does dim ceffylau ar y cae heddiw.

Cafodd y cae ei arolygu gan archeolegydd (a Dosbarth Hiasinth) yn 2023, a chafodd tŷ crwn ei ddarganfod tan y ddaear! Cafodd y tŷ crwn ei adeiladu yno gan bobl Oes Yr Haearn.

Cafodd hen allor ei darganfod tua 1850 mewn gardd tu ôl y cae. Cafodd yr allor ei gwneud gan y Rhufeiniaid. Cafodd hi ei symud i'r amgueddfa yn Abertawe yn 1951.

Cwestiynau:

1. Gafodd y cae ei aredig gan dractor?
2. Gafodd hen allor ei darganfod mewn gardd?
3. Gafodd yr allor ei gwneud yn 1850?
4. Gafodd yr allor ei symud i'r amgueddfa?
5. Gafodd yr allor ei gwneud gan bobl Oes Yr Haearn?
6. Gafodd y cae ei arolygu gan archeolegydd?
7. Gafodd castell ei ddarganfod tan y ddaear?
8. Gafodd y tŷ crwn ei adeiladu gan bobl Oes Yr Haearn?

Atebion:

1. Naddo 2. Do 3. Naddo 4. Do 5. Naddo 6. Do 7. Naddo 8. Do.

Ychwanegol: Gallai rhai o'r plant yn ateb mewn brawddegau llawn - e.e. 1. Naddo, cafodd y cae ei aredig gan geffylau. 2. Do, cafodd hen allor ei darganfod mewn gardd.

Y Dyniaethau

Tasg Ddarllen: lefel uwch

Os oes disgyblion yn y dosbarth sy'n barod am her, gallai'r athro weithio gyda grŵp bach i ddarllen y daflen hon, ac wedyn, gallen nhw weithio gyda'i gilydd i ddeall y cwestiynau gwahanol.

Hanes Cae'r Ysgoll

Roedd cae'r ysgoll yn cael ei ddefnyddio fel fferm cyn i'n hysgol ni gael ei hadeiladu. Cafodd y cae ei aredig gan aradr feirch (gyda cheffylau). Does dim ceffylau ar y cae heddiw achos mae e'n cael ei ddefnyddio gan blant am ymarfer corff!

Cafodd y cae ei arolygu gan archeolegydd (a Dosbarth Hiasinth) yn 2023, a chafodd rhywbeth crwn ei ddarganfod tan y ddaear! Cafodd y tŷ crwn ei adeiladu yno gan bobl Oes Yr Haearn. Cafodd y lle hwn ei ddewis achos roedd ffynnon yno, ac roedd yr olwg o'r afon yn ardderchog.

Cafodd hen allor ei darganfod tua 1850 mewn gardd tu ôl y cae (roedd hi'n cael ei defnyddio fel bath aderyn). Cafodd yr allor ei gwneud gan y Rhufeiniaid, felly mae hi'n bwysig iawn. Cafodd hi ei symud i'r amgueddfa yn Abertawe yn 1951.

Cwestiynau:

1. Gafodd ein hysgol ni ein hadeiladu ar bwys hen fferm?
2. Ble cafodd yr hen allor ei darganfod?
3. Pryd cafodd yr hen allor ei symud i'r amgueddfa?
4. Am beth oedd yr allor yn cael ei defnyddio yn yr ardd?
5. Gafodd tŷ crwn ei ddarganfod gan ffermwr?
6. Pam cafodd y lle hwn ei ddewis i adeiladu tŷ crwn?
7. Gan bwy gafodd y tŷ crwn ei adeiladu?
8. Pam does dim ceffylau ar y cae heddiw?

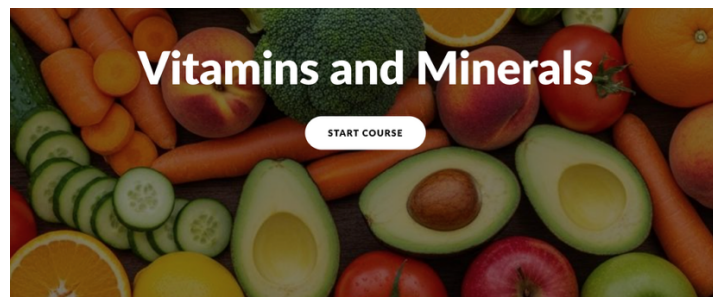

Lesson hook video: A video that I created with Adobe Express using footage from friends in Northern Canada. This introduced the geography hook for a Welsh grammar lesson about comparative and superlative language.

vimeo.com/1190286349

Online course: An online course that I designed with Articulate Rise 360 to enable independent learning in my classroom:

tinyurl.com/5trvf8h4

Year 4 pupils will learn what vitamins and minerals are, how they help us to maintain healthy bodies, and the names of some foods that contain lots of vitamins and minerals.
